1 Introduction

1.1 What is NutriTrackWeb?

NutriTrackWeb is a web application with which a nutritionist looks after her clients: appointments, messages, documents, meal photos, payments and measurements (weight, height) in one place. Name, logo and colours can be configured, so the application fits every nutritionist.

1.2 Roles

There are two roles:

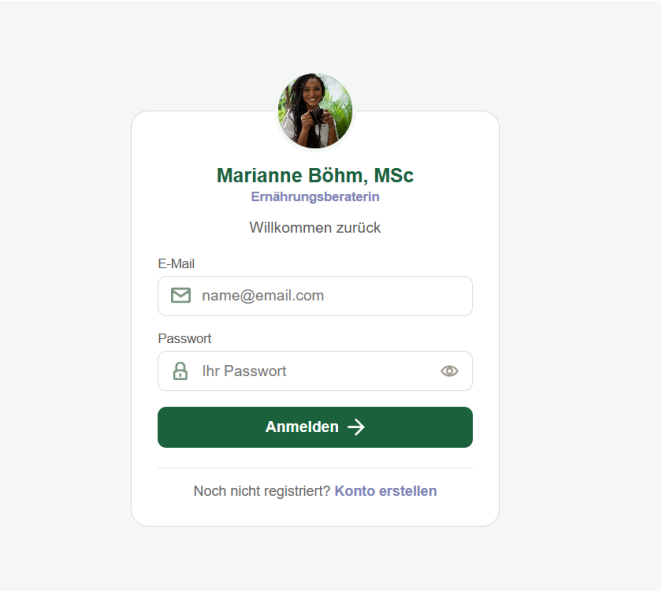

Role	Who	What they can do
Admin	The nutritionist (owner of the practice)	Review registrations, manage clients, appointments, messages, documents, meal photos and payments, configure profile and payment details
User	An approved client	See their own appointments, messages, documents, meal photos, payments and measurements; only their own data is visible

Note: All names, accounts, payment details and the PIX QR code in the demonstration are test data. The QR code is explicitly marked as a demonstration and does not work for real payments. The login details of the demo accounts are in the file *Zugangsdaten.txt*.

2 Access and Login

2.1 Opening the Application

In the XAMPP Control Panel, start Apache and MySQL and open *https://localhost/nutritrackweb/* in the browser. The login page shows the nutritionist's profile.

Login page

2.2 Registration

New clients register themselves:

1. On the login page, choose “Create Account”.
2. Enter personal data, first measurements (weight, height), e-mail and password (at least 8 characters).
3. Upload the latest blood test as a PDF (at most 10 MB). The field is required.
4. Confirm the privacy policy and submit. The account now has the status “Pending”.

2.3 Approval

The Admin reviews every registration. Until a decision is made, the client only sees the status page:

Status	Meaning	What the client sees
Pending	The registration is being reviewed	Notice that the review is in progress
More information	The Admin needs further details	Reply form on the status page; after sending, the status returns to “Pending”
Rejected	The registration was not accepted	Notice, without access to the application
Approved	Full access	Home page with all areas

2.4 Logging In and Out

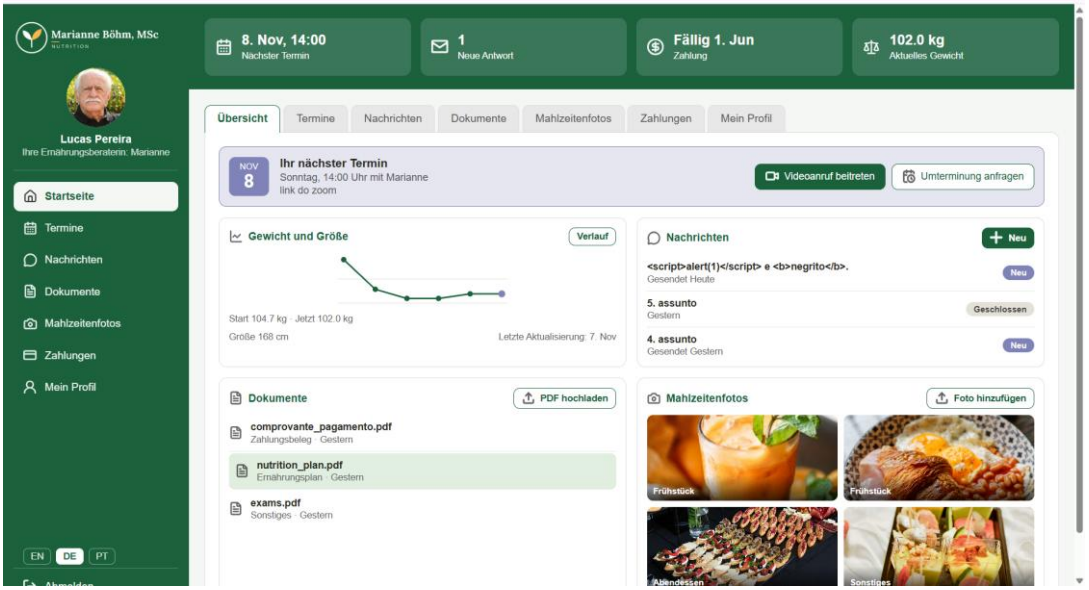

Enter e-mail and password and choose “Log in”. With “Logout” in the side menu the session ends. For security, you are logged out automatically after 30 minutes without activity and have to log in again.

3 For Users

After approval, a menu appears on the left with Home, Appointments, Messages, Documents, Meal Photos, Payments, My Profile and Logout. The same areas are also available as tabs at the top. Above the Logout button the language (EN, DE, PT) can be changed.

3.1 Home

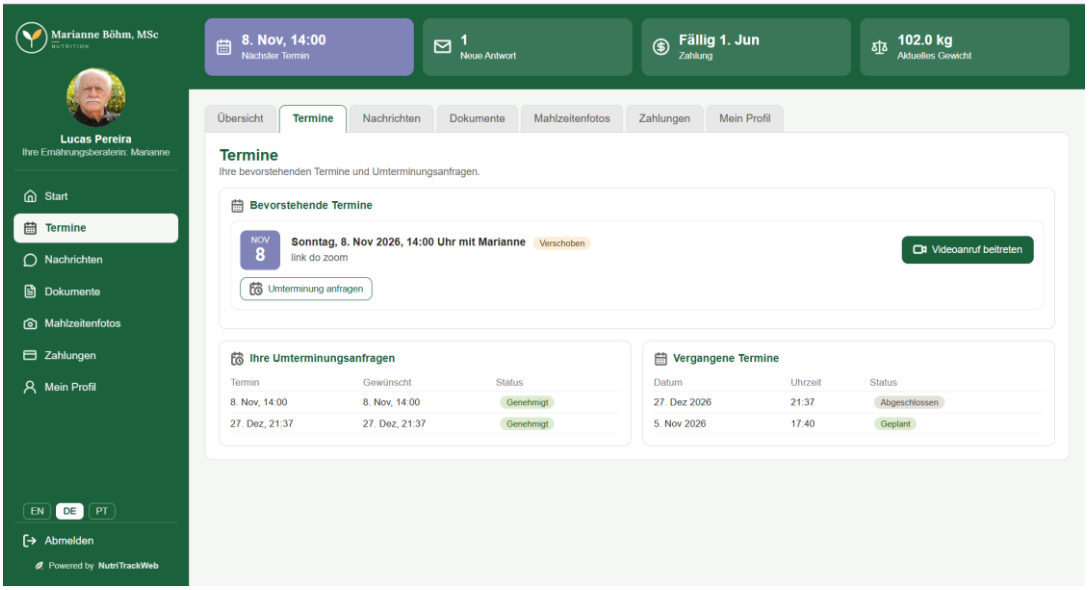

The home page shows four indicators (next appointment, new reply, payment, current weight), the next appointment with a link to the video call (if available), the weight history, and the latest messages, documents and meal photos with shortcuts.

Home page of a User

3.2 Appointments

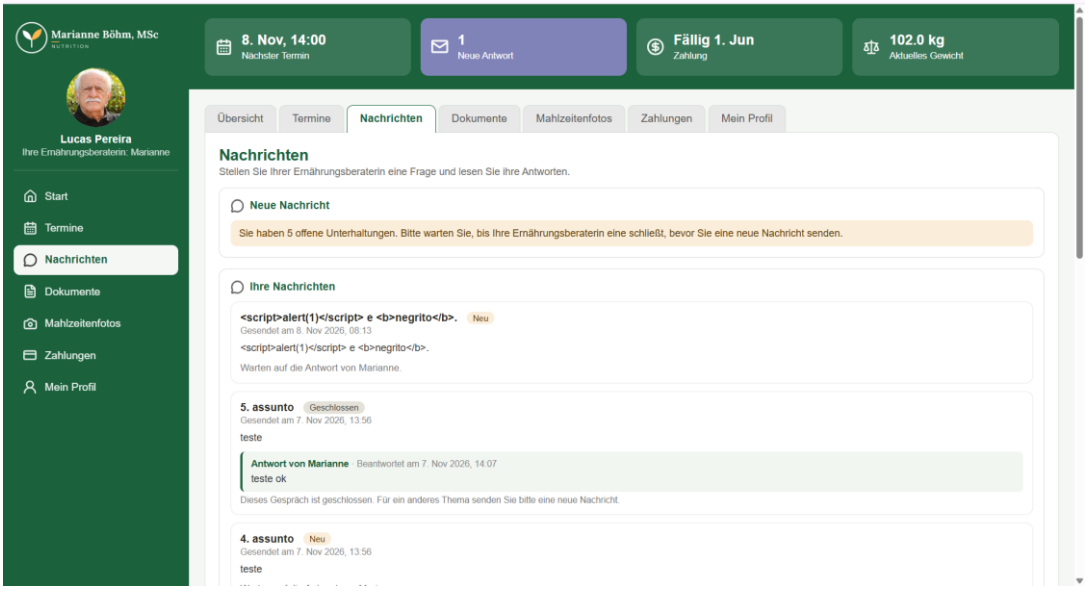

1. Under “Appointments” you see upcoming and past appointments with date, time, notes and status.
2. To reschedule, choose “Request reschedule”, enter the new date (after today, at most one year ahead), the new time and a reason (required, at most 1000 characters) and send.
3. Only one open request is possible per appointment. The Admin approves or rejects it; you see the status under “Your reschedule requests”. Users cannot cancel appointments themselves.

Appointments

3.3 Messages

1. Choose “New”, enter a subject (at most 255 characters) and text (at most 5000 characters) and send.
2. The Admin replies once; the status changes from “New” to “Answered”. A message is not a chat: one question and one answer.
3. The Admin closes the conversation; afterwards it is read-only for both. For a new topic, write a new message.
4. At most 5 conversations can be open at the same time (New or Answered). As soon as the Admin closes one, there is room again.

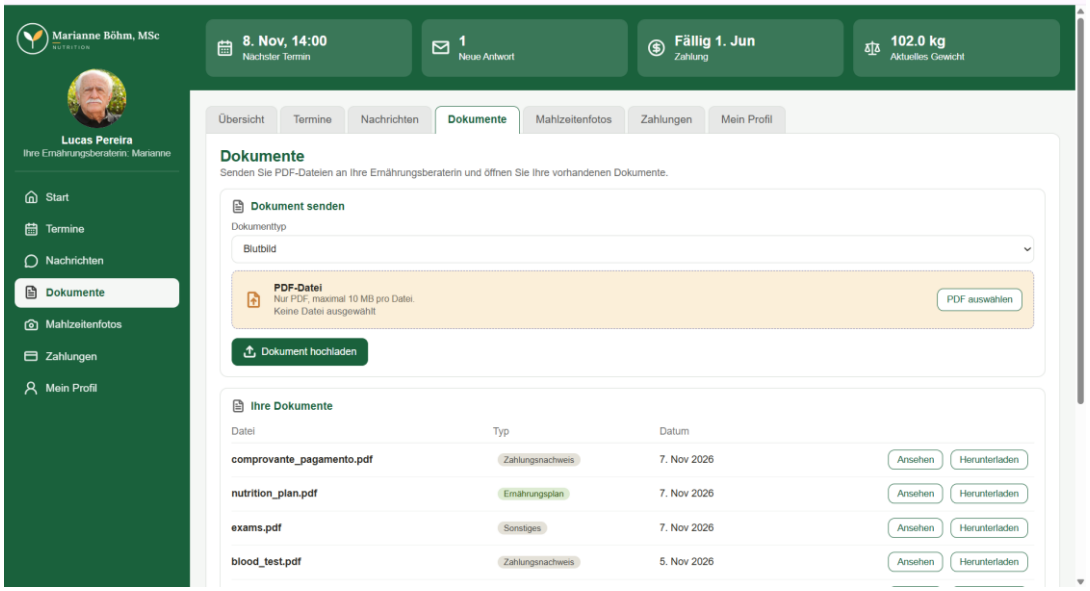

Messages

3.4 Documents

1. Under “Documents”, choose the type (Blood test, Payment proof or Other) and upload a PDF file (at most 10 MB).

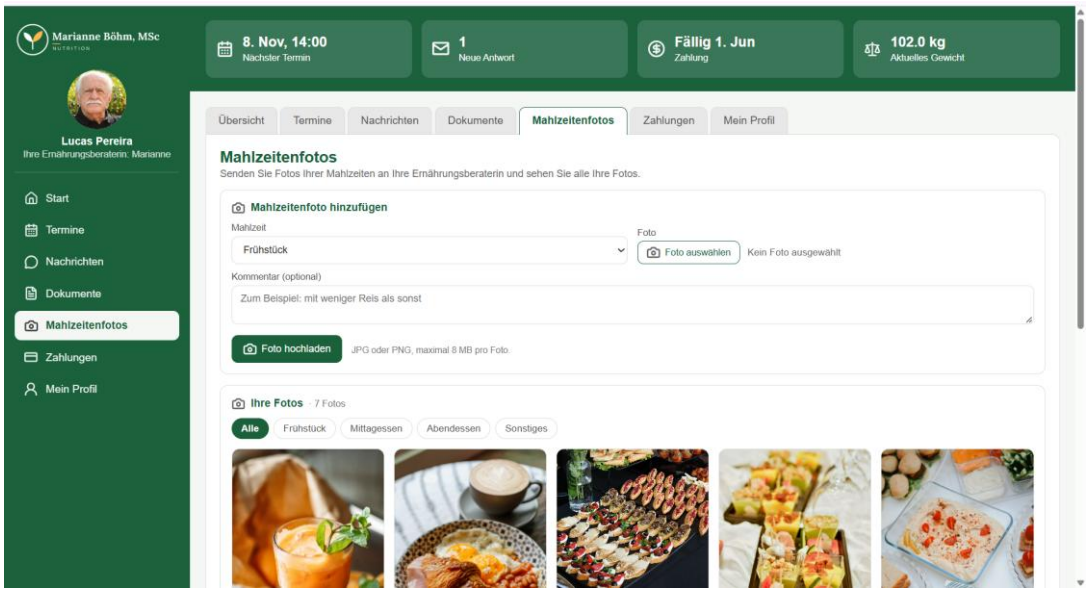

2. The list shows all your documents, including nutrition plans that the Admin uploaded for you. With “View” or “Download” you open them.
3. In this version, uploaded documents cannot be deleted.

Documents

3.5 Meal Photos

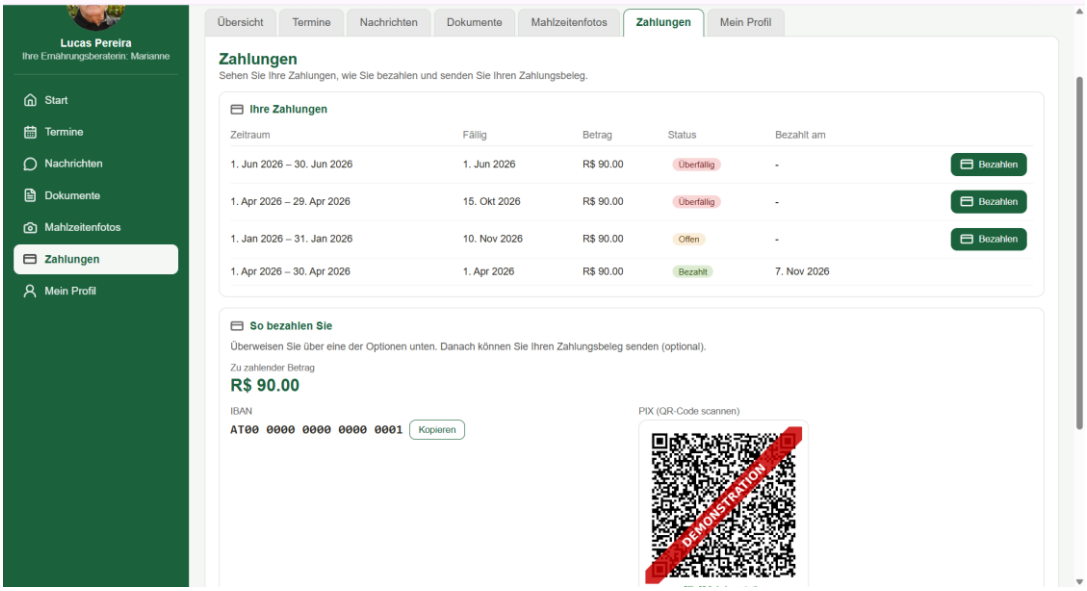

1. Choose the meal (Breakfast, Lunch, Dinner, Other), select a JPG or PNG photo (at most 8 MB) and optionally enter a comment (at most 500 characters).
2. The photos appear as a grid (12 per page), filterable by meal; a click enlarges the photo.
3. Your own photos can be deleted after a confirmation prompt. For questions about a photo, use “Messages”.

Meal Photos

3.6 Payments

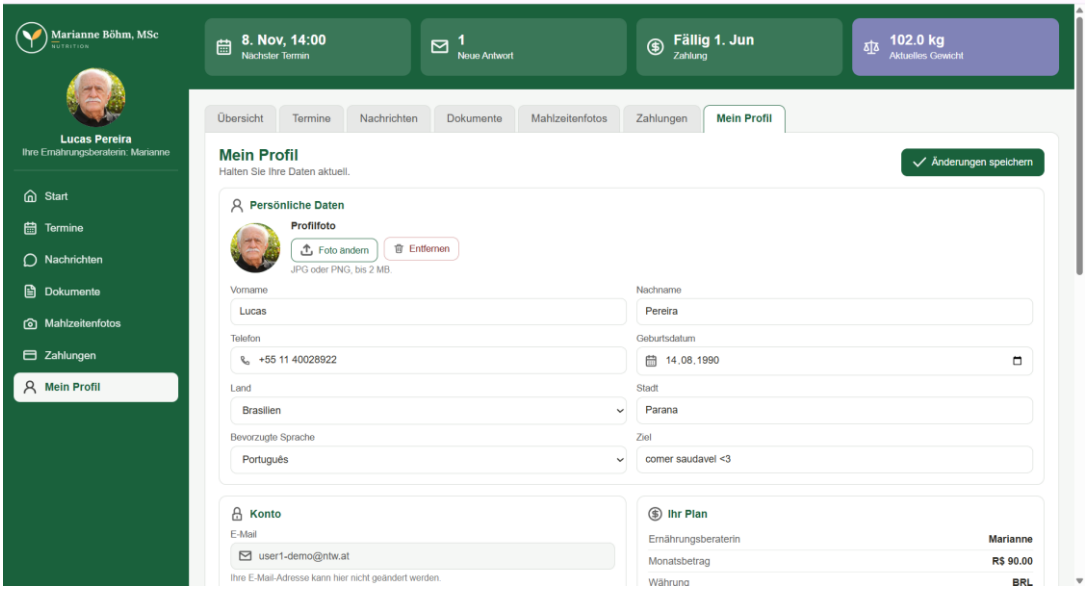

1. The list shows period, due date, amount and status (Open, Paid). Open payments after the due date appear in red.
2. “Pay” shows the Admin's IBAN (with a copy button) and PIX QR code. The payment itself takes place outside the application.
3. Optionally you can upload a payment proof (PDF). The Admin marks the payment as paid herself.

Payments with IBAN and PIX QR code

3.7 My Profile

- Change personal data (name, phone, date of birth, country, city, goal, preferred language). The e-mail address cannot be changed. With “Save changes” the data is saved.
- Profile photo (JPG or PNG, up to 2 MB): with “Change photo” choose a new photo, with “Remove” delete the photo. The preview in the circle changes immediately; it is only saved when you click “Save changes”. Without a photo, the initials are shown.
- Change password: enter the current password, the new password (at least 8 characters) and the confirmation.
- Under “Your plan” you see the monthly amount and currency; the Admin sets these.
- Add a new measurement: weight and/or height must be greater than 0 and at most 999.99. Wrong entries are deleted with the trash icon and created again; editing is not provided.

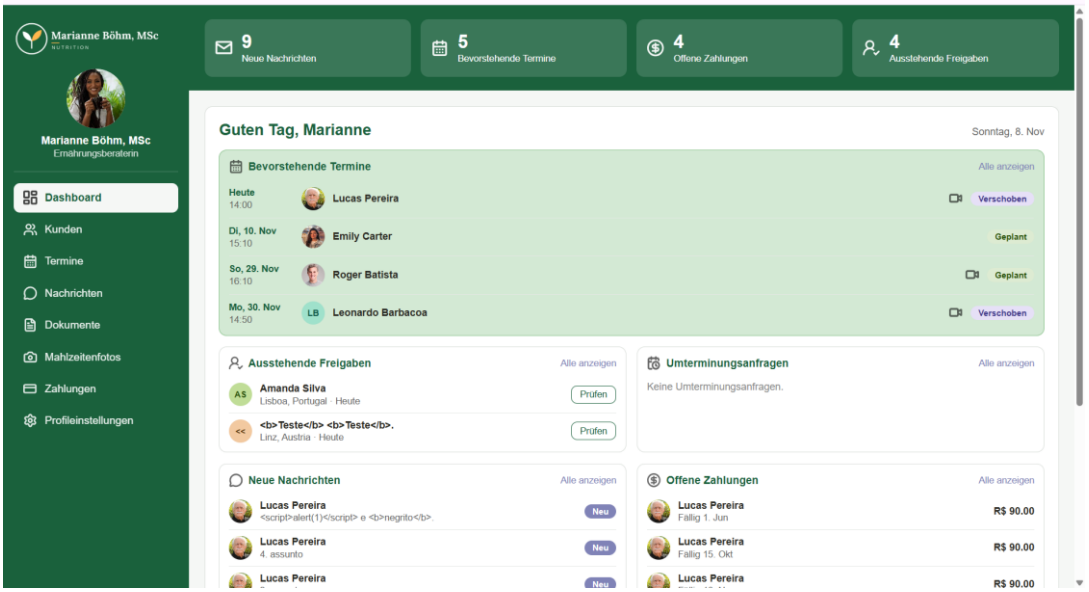

My Profile

4 For Admins

The side menu contains Dashboard, Clients, Appointments, Messages, Documents, Meal Photos, Payments, Profile Settings and Logout. Change the language (EN, DE, PT) with the switch above the Logout button.

4.1 Dashboard

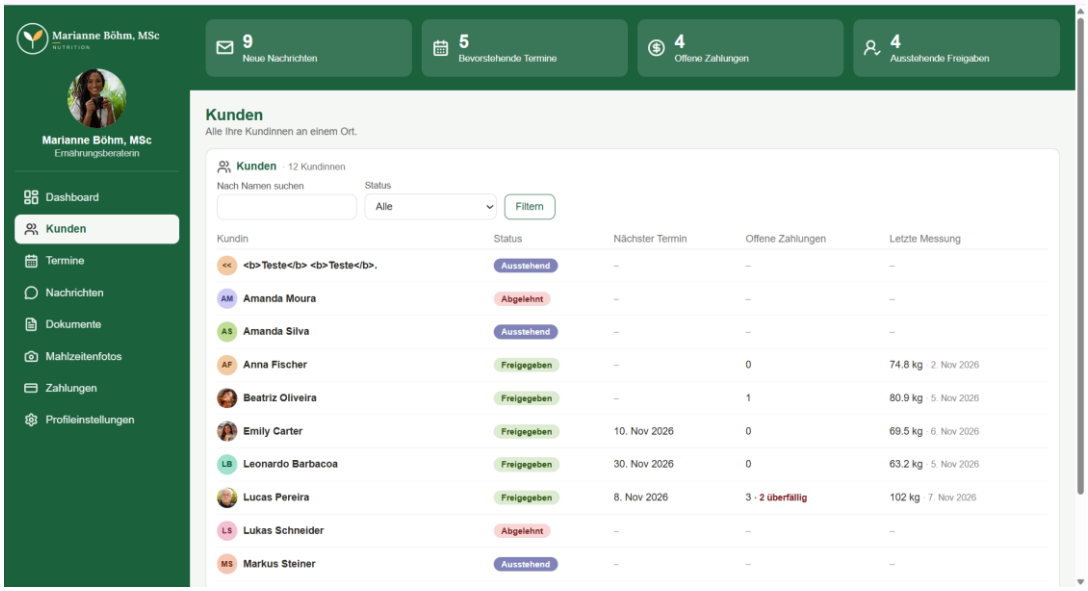

The Dashboard shows four indicators (new messages, upcoming appointments, open payments, pending approvals), the reschedule requests (Approve or Reject, with a confirmation prompt), the next appointments, open registrations, new messages, open payments and recent meal photos. “View all” leads to the respective list, for registrations and payments already with the suitable filter.

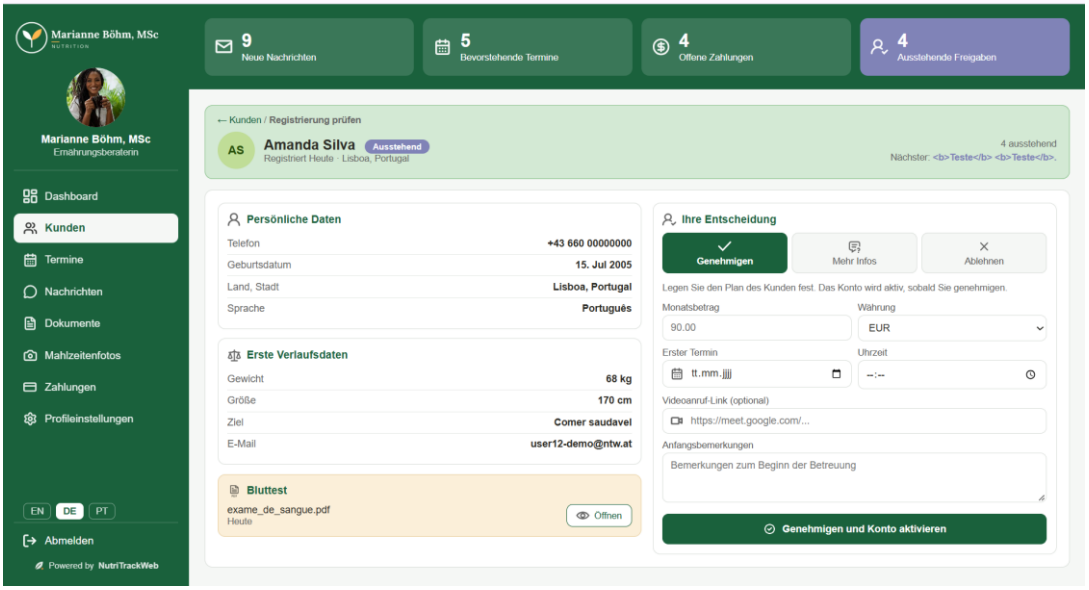

Admin dashboard

4.2 Clients and Reviewing Registrations

1. Under “Clients” you search by name or e-mail and filter by status (Approved, Pending, More information, Rejected). The list shows photo, status, next appointment, open payments (overdue ones in red) and last measurement, 20 entries per page.
2. A click on a client who is not yet approved opens the review page: view the details, open the blood test and approve the registration, reject it or request more information. The client's reply arrives as a message and the status returns to “Pending”.
3. A click on an approved client opens the client profile with shortcuts (appointments, messages, documents, meal photos, payments – each already filtered for this client), the personal data (read-only), the weight chart and the latest measurements.
4. In the profile you set the monthly amount (optional, up to 2 decimal places) and the currency (EUR, USD, BRL). The client changes other data themselves.

Client list

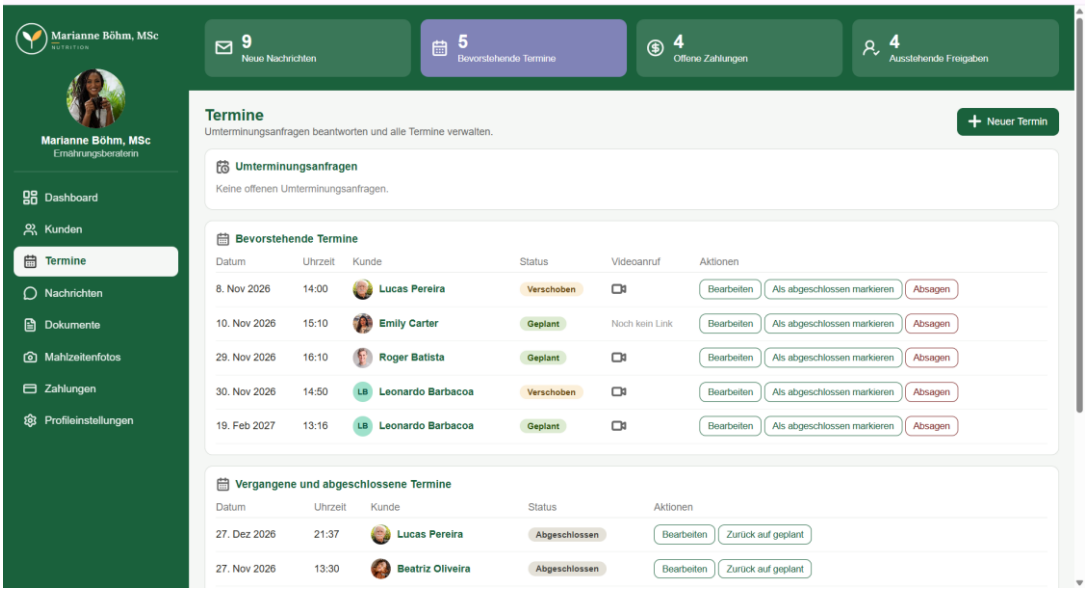

Reviewing a registration

In all lists, a client's name is a link to their profile. This way you get there directly from any page, without using the client list.

4.3 Appointments

1. At the top are open reschedule requests: the current and the requested appointment and the reason are shown; if there is a conflict with another appointment, a warning appears. “Approve” moves the appointment, “Reject” leaves it unchanged.
2. “New appointment”: choose an approved client and enter the date (today or later), the time, an optional link for the video call (http/https only) and notes.
3. In the list, appointments can be edited, marked as completed, cancelled, or set from “Completed” back to “Scheduled”. Appointments are never deleted.

Appointment management

4.4 Messages

Tabs New, Answered, Closed and All, with counts. You answer a new message once; afterwards you can close the conversation (with confirmation). Only clients start conversations.

4.5 Documents

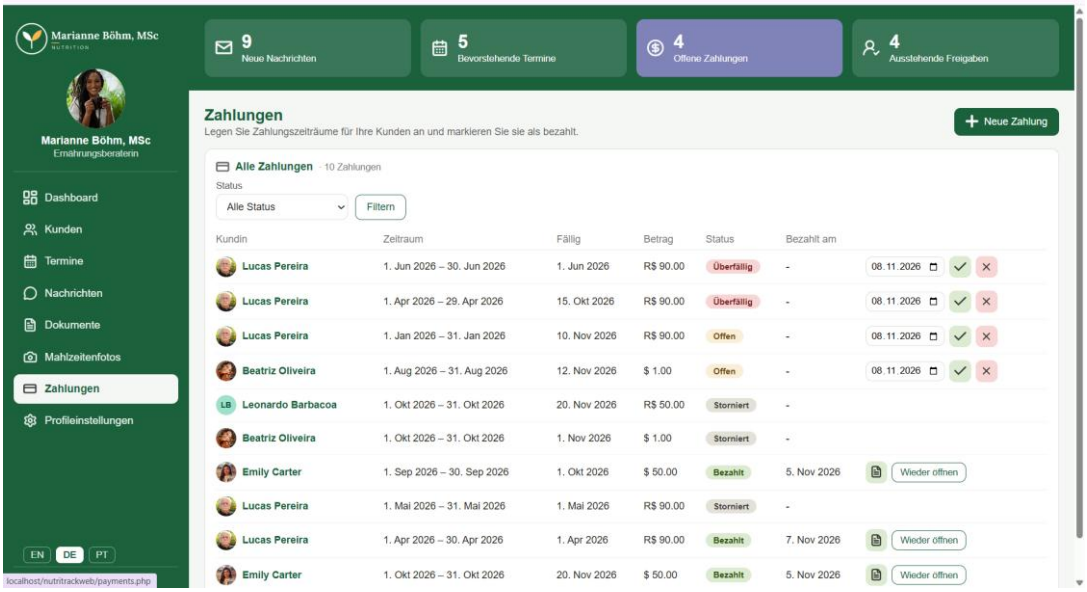

List of all documents with search (name, file name), type filter and sorting. With the upload function you upload a nutrition plan or another PDF for an approved client (at most 10 MB). Documents are opened or downloaded, but not deleted.

4.6 Meal Photos

Gallery of all photos (24 per page) with filters by client, meal and period. A click enlarges the photo with name, meal, date and comment. Clicking the name opens the client profile. Feedback on a photo is sent through the messages.

4.7 Payments

1. “New payment”: choose an approved client, the billing period (at most one year) and the due date. Amount and currency come from the client profile. A period must not overlap with an existing, non-cancelled payment of the same client.
2. The list shows open payments first, with a status filter. Icons: Mark as paid (payment date, not in the future), Cancel (with confirmation), Reopen and, for paid payments, the client's proofs.
3. “Overdue” is not a status of its own, but an open payment after the due date (red). Cancelled payments cannot be reactivated.

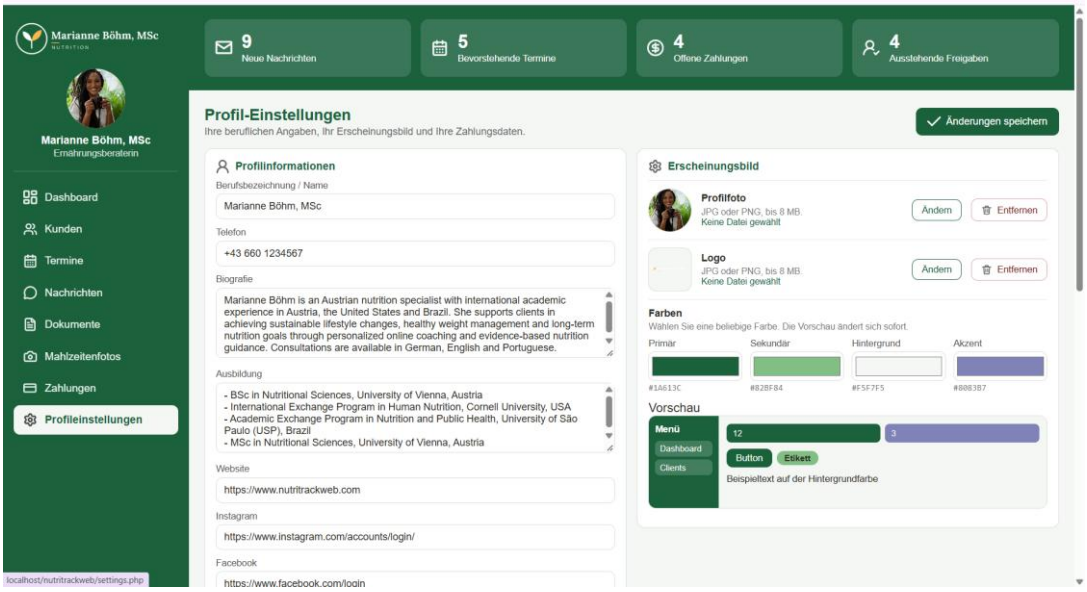

Payment management

4.8 Profile Settings

- Profile information: name, phone, bio, education, website and links to Instagram, Facebook, LinkedIn.

- Appearance: profile photo, logo (JPG/PNG, at most 8 MB) and four colours with live preview. The colours apply immediately to the whole application.
- Payment information: IBAN and PIX QR code (image). With the trash icon you remove an image.
- Account: the e-mail address is only displayed. Change the password with the current and the new one (at least 8 characters).

Profile Settings

5 Language, Security and Limits

5.1 Language

The application is available in English, German and Portuguese. The EN | DE | PT switch in the side menu applies to the current session. The “preferred language” in the client profile is stored separately. On the status page for clients who are not yet approved there is no switch.

5.2 Security and Data Protection

- Passwords are only stored in encrypted (hashed) form.
- Every page checks login and role; Users only see their own data.
- Forms are protected against forged requests (CSRF token), input is validated and output is escaped.
- Documents and meal photos are stored in protected folders and can only be reached through the application; a direct link to the file is rejected.
- Uploads are checked for type, content and size: PDF up to 10 MB, JPG/PNG up to 8 MB (the User's profile photo up to 2 MB).
- After 30 minutes of inactivity, the user is logged out automatically.

5.3 Not Part of Version 1

Forgot password, automatic reminders and recurring payments, online payment, deleting or replacing documents, editing meal photos and measurements, deactivating clients and changing the e-mail address. These points are planned for a later version.

> **Note:** The application currently only runs locally. Hosting on the internet (own domain, real certificate) was not implemented and is planned for a later version.

6 Frequently Asked Questions

Question	Answer
I only see the status page.	Your registration has not been approved yet. Wait for the Admin's decision or answer her question.
I cannot send a new message.	You already have 5 open conversations. As soon as the Admin closes one, you can write again.
I entered a wrong weight.	Delete the entry with the trash icon and create it again.
The upload is rejected.	Check type and size: PDF up to 10 MB for documents, JPG or PNG up to 8 MB for meal photos.
I was suddenly logged out.	After 30 minutes without activity the system logs out automatically. Please log in again.
I cannot create a payment.	The billing period overlaps with an existing payment of the same client, or the client is not approved.
The page is in the wrong language.	Change the language with EN, DE or PT in the side menu.
My photo is gone and initials appear.	Under “My Profile”, choose a new photo with “Change photo” and save.
